

Pooling Solutions

2Return. Your partner for pooling and packaging recovery.
Full management of logistics resources
with track & trace.

2Return is the specialist in the area of pooling, managing and administrating packaging recovery. With a logistics network in nine European countries, we are a reliable partner for the distribution, maintenance, repair and cleaning of roll containers at national and international level.

- Cost efficient
- Up-to-date availability
- Fully unburdened
- Monthly reports
- Track & Trace

How does the 2Return pool work for roll containers?

2Return makes the roll containers available for you to use, and you have the option to have us organise the transport or to keep transport in-house. By scanning unique barcodes on the roll containers, our smart IT system can monitor the roll containers, whether they are at your own site or with your purchasers. This ensures that you always have insight into current stocks, irrespective of the site where they are being used. This prevents a surplus of roll containers on one site or a shortage on another. From the time the roll containers are returned to our depot, irrespective from which site, you have an accurate overview of the returned numbers. This ensures roll containers are never lost and you never pay too much.

What is the difference between leasing and pooling?

Leasing means making roll containers available temporarily subject to a rental charge. You are fully responsible for localising the leased roll containers. In contrast to leasing, roll containers from a pool are made available to you, but they are also tracked completely with track & trace. This means you can always find out where the roll containers are, be that on your site or the site of your purchasers.

Who benefits from the 2Return pool for roll containers?

The 2Return roll container pool is for anyone who wants to have insight into the stock management of his logistics resources. A temporarily increased demand for roll containers, due to seasonal effects, is easy to absorb by using our pool fleet. It means you always have the right numbers of roll containers available at any time.

Benefits of pooling:

- No need to invest in roll containers, so it saves costs
- Always up-to-date availability of logistics resources at your sites
- Good quality roll containers always available
- No loss of expensive load carriers, no buy off in the case of no returns
- Fully unburdening your roll container fleet, so you can focus on your core activities
- Clear monthly reports on the use and availability

Track & Trace

Each roll container has a unique barcode. The roll containers can be scanned easily with a special smartphone app as soon as they leave the various sites. No need to invest in software or hardware.

We offer our pooling activities for roll containers, but also for H1 pallets and plastic boxes. For more information, please visit our website www.2Return.nl.

2Return uses the international network of the Rotom Group and its partners.

2Return has various roll containers in its range, suitable for different sectors:

	2-sided roll container	3-sided roll container	Anti-theft roll container	Flower trolley
				
Item number	46500U	46236U	46252U	40027U
